Instructions for JTBAL41

The JTBAL41 is a 4:1 voltage type balun. It is designed for outside use to match a 200 ohm feed point to 50 ohms or 300 ohms to 75 ohms. A typical use for a 4:1 balun would be to feed a folded dipole with 50 ohm cable. The original Carolina Windom antenna uses a 4:1 balun.

Folded Dipole

Carolina Windom

Specifications:

Max power: 1500 watts

Connector: SO239

Voltage Type

Ratio 4:1

3.5-30 Mhz

Safety Instructions:

Do not install on a rainy or windy day.

Do not install near power lines.

Do not install by yourself, always have someone else near by to help.

If antenna comes in contact with electric lines, do not try to remove.

Call your electric company immediately.

If you do not have experience at installing antennas, seek the help of a professional.
